Summary

This operation pertains to get all bets stored in the db

Responses

Code	Description	Schema
200	Successfully retrieved the bets	\Leftrightarrow <code>▼ Iterable«Bet» {</code>
401	Unauthorized	
403	Forbidden	
404	Not Found	

[Try this operation](#)

Summary

Add a bet, this operation will persist the bet in the db and create the transactions resulting from the bet. At end a block is mined

Parameters

Name	Located in	Description	Required	Schema
bet	body	Bet between two players	Yes	<div><div>↔</div><div><div>▼Bet {</div><div>amount: number</div><div>id: string</div><div>player1: ►User { }</div><div>player2: ►User { }</div><div>}</div></div></div>

Responses

Code	Description	Schema
200	Successfully added in the db and mined	<div><div>↔</div><div><div>▼ResponseEntity {</div><div>body: ► { }</div><div>statusCode: string</div><div>statusCodeValue: integer</div><div>}</div></div></div>
201	Created	
401	Unauthorized	
403	Forbidden	
404	Not Found	
500	The bet was not persisted and not mined	

Try this operation

/api/chain

GET /api/chain

BetRoyale API

Summary

This operation pertains to get the entire blockchain

Responses

Code	Description	Schema
200	Successfully retrieved the blockchain	<div><div>↔</div><div><div>▼BlockchainDTO {</div><div>chain: ▶[]</div><div>length: integer</div><div>}</div></div></div>
401	Unauthorized	
403	Forbidden	
404	Not Found	

Try this operation

/api/mine

Summary

This operation pertains mine a new block with all actual transactions. It's only for test purpose

Responses

Code	Description	Schema
200	Successfully retrieved the users	<pre>▼Block { id: integer nonce: integer previousHash: string timeStamp: integer transactions: ►[] }</pre>
201	Created	
401	Unauthorized	
403	Forbidden	
404	Not Found	

[Try this operation](#)

/api/sampleBetData

Summary

This operation pertains to get sample of bet data. The data aren't persisted It's only for test purpose

Responses

Code	Description	Schema
200	Successfully returned the sample data	\Leftrightarrow ▼ Iterable«Bet» { }
401	Unauthorized	
403	Forbidden	
404	Not Found	

[Try this operation](#)

/api/transactions

POST /api/transactions

BetRoyale API

Summary

This operation pertains to add a transaction for the next block mined. It's only for test purpose

Parameters

Name	Located in	Description	Required	Schema
transaction	body	Transaction to add in the next block	Yes	<pre>▼ Transaction { amount: number recipient: string sender: string }</pre>

Responses

Code	Description	Schema
200	Successfully retrieved the users	<pre>⇒ string</pre>
201	Created	
401	Unauthorized	
403	Forbidden	
404	Not Found	

Try this operation

/api/user

Summary

This operation pertains to get all users stored in the db

Responses

Code	Description	Schema
200	Successfully retrieved the users	\Leftrightarrow <code>▼ Iterable«User» {</code>
401	Unauthorized	
403	Forbidden	
404	Not Found	

[Try this operation](#)

Summary

Add a user, this operation will persist the user in the db

Parameters

Name	Located in	Description	Required	Schema
user	body	User to add in the DB	Yes	<div><div>▼User {</div><div>id: string</div><div>pseudo: string</div><div>tag: string</div><div>}</div><div>↔</div></div>

Responses

Code	Description	Schema
200	Successfully added in the db	<div><div>▼User {</div><div>id: string</div><div>pseudo: string</div><div>tag: string</div><div>}</div><div>↔</div></div>
201	Created	
401	Unauthorized	
403	Forbidden	
404	Not Found	

Try this operation

/api/v1/chain

GET /api/v1/chain

BetRoyale API with another version of proof of work

Summary

getChain

Responses

Code	Description	Schema
200	OK	<div><div>▼BlockchainDTOV1 {</div><div>⇔chain: ▶[]</div><div>length: integer</div><div>}</div></div>
401	Unauthorized	
403	Forbidden	
404	Not Found
